## Follow the Money

*Get the Numbers in Order, and  
Your Case Might Just Go Better*

A clear understanding of where the money came from, and where it went to, can be very helpful in resolving a dispute. Here are two examples:

1. In a dispute around a family health team, I prepared a summary of funds in and funds out, covering the last 10 years. This allowed the parties to focus on the contentious transactions, moving the dispute from a series of vague allegations to a much more focused set of issues.
2. In a dispute between a developer and an investor, I tracked the funds from the project's start until completion, and based on this was able to identify the related party transactions. This allowed the litigants have a fact-based negotiation, leading to an agreed resolution.

*I can help you with damage quantification, and accounting investigations.*

*Numerical clarity a specialty.*
